GENERAL INSTRUCTIONS

These instructions should be read carefully and retained after installation by the end user for future reference and maintenance.

These instructions should be used to aid installation of the following product:

DC001

This door chime kit comes with:

- 1 x Receiver
- 1 x Bell push
- 1 x CR2032 battery for bell push
- 1 x Double-sided adhesive pad
- 1 x Instruction manual

Legend

- 1. Speaker
- 2. LED Indicator
- 3. Sound and flash switch
- 4. Battery cover
- 5. Volume button
- 6. Melody selector
- 7. Auto learning code button
- 8. Screw mounting point
- 9. Bell push
- 10. Nameplate cover
- 11. Front and back cover hook
- 12. Standby holes for screws
- 13. Opening slot

INSTALLATION

Notes prior to installation

- Fixing screws and wall plugs are not included
- Avoid positioning the bell push on metal door frames as this may affect the signal
- Avoid positioning above or near heat sources such as radiators, or in damp areas such as kitchens and bathrooms
- Please note the IP (Ingress Protection) rating of the bell push when deciding the location for installation
- The bell push is IP44 rated

User hints – If the receiver does not sound, please check the following:

- Flat batteries in either the bell push or receiver – change the batteries
- Wrong battery polarity in either bell push or receiver – re-insert batteries correctly
- Units are out of range – operate the receiver within the recommended operation range
- If the receiver is getting interference take the battery out of the bell push, unplug receiver, wait for 10 seconds then replace the battery, repeat procedure to generate new auto learning code

Battery Installation

- Each bell push uses a CR2032 battery (included)
- Remove the nameplate cover. Remove the small rubber screw cover in lower right-hand corner with thin-tipped tweezers or a needle, and unscrew the retaining screw (see Fig. 1)
- Insert a flat-head screwdriver into the slot on the bottom of the bell push and gently turn to open the front cover
- Install the CR2032 battery ensuring the polarity is correct (+ side up) and replace front cover
- Replace the retaining screw, rubber cover, and the nameplate cover

Fig. 1

Wall Mounting Bell Push

- Before drilling into any wall or surface, ensure there are no cables or pipes that could be accidentally damaged
- When using screws to attach to a surface, open the bell push as instructed in Fig. 1, pierce the fixing holes on the rear of the bell push and mark locations for drilling
- Screw the backplate to the surface and replace cover
- To attach using the double-sided adhesive pad, ensure surface is clean and dry
- Peel back one side of the pad and attach to the bell push. Peel back the rear of the pad and attach to the desired surface (see Fig. 2)

Fig. 2

Receiver Unit Installation

Remove the battery cover and insert 2 x AA batteries (not included). Ensure battery polarity matches internal markings (see Fig.3).

Fig. 3

- **Melody selection:** Press the selector to choose a different melody then press bell push once to store
- **Sound and Flash:** Slide this switch to the left position and the receiver will work with sound only; slide to the middle position and the LED will flash only; slide to the right position for sound and LED flash
- **Volume adjustment:** Press to adjust the sound volume - high, medium or low
